

Letter of Commitment to CIT4COM project

*attention of
Agenzia nazionale per le nuove tecnologie, l'energia e lo sviluppo economico -ENEA, Italy*

The Austerland Energy project hereby express the firm interest to actively support the project “Enabling **CIT**izens to enhance the role of prosumers building up collective actions **FOR** Energy **COM**munities” (CIT4COM) project, assuming that the project is approved for funding and implementation in the framework of the Horizon 2020 programme within the call LC-SC3-EC-1-2018- 2019-2020 “The role of consumers in changing the market through informed decision and collective actions”.

In particular, Austerland Energy project will participate representing a Case Study on community energy initiatives carried out in SWEDEN.

In a perspective of a productive dialogue we will be available for:

- participating in selected activities such as learning labs, focus groups, meetings etc.
- answer a dedicated survey to collect data on energy consumption, behaviours, home equipment, attitudes to energy efficiency initiatives and sustainable choices etc.
- learn the use digital tools (e.g. IoT, Smart Home, Blockchain platform)
- attending dissemination events in our country
- participate in some transfer initiatives in other territorial contexts (travel and accommodation costs will be reimbursed)

The Austerland Energy project is aligned with the CIT4COM visions and priorities and strongly supports the project proposal. The Austerland Energy project states its commitment to cooperate with the project consortium and with the Agenzia nazionale per le nuove tecnologie, l'energia e lo sviluppo economico -ENEA.

We are convinced that the proposed activity will have a significant impact by supporting evidence-based models to change the role of consumer building collective actions oriented to increase energy efficiency and/or optimise energy management to integrate a higher share of renewable energy within the community.

We are looking forward to a fruitful collaboration.
